Clone this wiki locally

<https://github.com/JazzCore/python-pdfkit.wiki.git>

Visit the [wkhtmltopdf home page](#).

Linux

Download the static binary for your architecture at the [wkhtmltopdf downloads list](#), extract the file to a directory that is in your PATH, such as /opt or /usr/local/bin and run from there.

Debian / Ubuntu

```
apt-get install wkhtmltopdf
```

Fedora / RHEL / CentOS

```
yum install wkhtmltopdf
```

Windows

Download the installer from the [wkhtmltopdf downloads list](#) and add folder with wkhtmltopdf binary to PATH.

Mac

Download the disk image from [wkhtmltopdf downloads list](#) and copy the file to a directory where PDFKit can find it. Homebrew is also available, run `brew install Caskroom/cask/wkhtmltopdf`.

Compilation

You can also [compile from source](#) (see the FAQ).

```
hello
```
